

YASH DARGAD

AI/ML Engineer · Software Engineer · Full-Stack Web Developer

Pune, Maharashtra, India | +91-9156647056 | yashdargadpartur1@gmail.com

[linkedin.com/in/yash-dargad-897502333](https://www.linkedin.com/in/yash-dargad-897502333) | github.com/yash7056 | [Digital Portfolio ↗](#)

PROFESSIONAL SUMMARY

Highly motivated B.Tech Computer Science student (CGPA: 9.24/10) at D Y Patil College of Engineering, Pune, with hands-on experience building full-stack web applications and AI-powered tools. Proficient in the MERN stack, Python, and C++, with practical exposure to computer vision, biometric security, and IoT. Passionate about developing scalable, production-ready software and eager to contribute as an AI/ML Engineer or Software Engineer.

TECHNICAL SKILLS

- **Languages:** C++, Python, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Node.js, Express.js, OpenCV, MediaPipe, Socket.io, Framer Motion, GSAP, Lenis (Smooth Scroll)
- **Databases:** MongoDB, SQL (MySQL)
- **Core Concepts:** Data Structures & Algorithms, Machine Learning Fundamentals, Computer Vision, IoT Architecture, Cloud Computing (SaaS/PaaS/IaaS), Cybersecurity Principles, Real-Time Systems, Scalable Architecture, AI-Driven Backend Integration
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Cortex XSIAM, Vite, Vercel
- **Methodologies:** RESTful API Design, MVC Architecture, Agile Development

EDUCATION

B.Tech — Computer Science & Engineering

Expected: June 2028

D Y Patil College of Engineering, Akurdi, Pune | CGPA: 9.24 / 10.00

- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Machine Learning Fundamentals

PROJECTS

Personal Portfolio Website — Interactive Video-Led Developer Portfolio

2026 – Present

Tech Stack: React.js · Vite · GSAP (ScrollTrigger) · Lenis (Smooth Scroll) · Framer Motion · React Icons · Vercel

- Designed and deployed a cinematic, single-page developer portfolio built with React and Vite, featuring a full-bleed autoplaying video hero section that establishes an immediate, memorable first impression.
- Implemented scroll-driven storytelling using GSAP with ScrollTrigger for staggered reveal animations (About, Skills, Process, Projects) and Lenis for buttery-smooth, inertia-based page scrolling.
- Structured the site into modular sections — Hero, About, Skills, Process, Projects, and Contact — each built as an independent, reusable React component with scoped CSS for maintainability.
- Curated a live, interactive showcase of flagship projects (NeighborTrust, Quick Load, AgriTech, MessHub) with direct GitHub and live-demo links, and an embedded downloadable resume.
- Optimized asset delivery (video, images) and animation performance for fast load times and smooth 60fps interactions across desktop and mobile viewports.

NeighborTrust — Verified Neighborhood Services Marketplace

2026 – Present

Tech Stack: Node.js · Express.js · MongoDB (Mongoose) · JWT Authentication · HTML5/CSS3 · Vanilla JavaScript (ES6)

- Built and deployed a full-stack, locality-first on-demand services marketplace connecting customers with verified local providers (plumbers, electricians, tutors, cleaners) via a custom Node.js/Express REST API and MongoDB Atlas, with JWT-based role access control for Customers, Providers, and Admins.
- Designed an AI-calibrated dynamic pricing engine that performs semantic analysis of customer job descriptions to classify job complexity and auto-generate itemized quotes (base rate, platform fee, GST).

- Implemented real-time geolocation features using the Haversine formula and the browser Geolocation API to compute customer-provider distance and generate one-click Google Maps navigation links.
- Developed a simulated multi-mode checkout flow (Credit Card, UPI QR, Cash on Service) with print-ready itemized billing receipts and unique transaction IDs.
- Built an in-app two-way chat system with live notifications and role-based dashboards splitting active jobs/bookings from historical records for Customers and Providers.

AI-Powered Logistics Management Platform (Quick Load)

2025 – Present

Tech Stack: MERN Stack (MongoDB, Express, React, Node.js) · Socket.io · AI-Driven Backend Logic · Framer Motion

- Engineered a real-time, full-stack logistics dashboard bridging customer demand and driver supply, leveraging Socket.io for instantaneous data synchronization across the MERN stack.
- Developed a high-performance, Glassmorphism-based UI with Framer Motion animations, optimized for enterprise-grade scalability and a professional user experience.
- Integrated AI-driven backend logic to handle dynamic ride/pricing data, ensuring accuracy and efficiency in supply chain operations.
- Architected the end-to-end booking lifecycle — from automated order placement and status tracking to dynamic PDF invoice generation — demonstrating strong data automation and scalable architecture skills.

AgriTech — Agricultural E-Commerce Website

2024

Tech Stack: MongoDB · Express.js · React.js · Node.js

- Built a full-stack marketplace to facilitate direct buying and selling of agricultural products between farmers and buyers.
- Implemented product listings, seller dashboards, search/filter functionality, and a fully responsive UI.

MessHub — Mess & Tiffin Service Finder

2024

Tech Stack: MERN Stack

- Created a web platform to help users discover, compare, and manage local mess/tiffin services.
- Implemented user authentication, service listing pages, and a booking/management interface.

CERTIFICATIONS

- Cybersecurity Virtual Internship: AICTE — EduSkills, Supported by Palo Alto Networks | Jan – Mar 2026 | Grade: O (Outstanding)
- Cloud Security Fundamentals: Palo Alto Networks | Feb 2026
- Security Operations Fundamentals: Palo Alto Networks | Feb 2026
- Solutions Architecture Job Simulation: AWS — Forage | Jul 2025
- Data Analytics Job Simulation: Deloitte — Forage | Jul 2025
- Introduction to Generative AI Studio: Google Cloud | Jan 2026
- TCS iON Career Edge — Interview & Job Readiness: Tata Consultancy Services | Feb – Mar 2026
- Communication Skills: TCS iON | Feb 2026
- Introduction to Soft Skills: TCS iON | Feb 2026
- EF SET English Certificate: EF Standard English Test | Score: 77/100 — C2 Proficient | May 2026

ACHIEVEMENTS & ADDITIONAL INFORMATION

- **Academic Excellence:** CGPA of 9.24/10.00 — placing among the top performers in the Computer Science department.
- **Deployed Real-World Applications:** Independently built and deployed multiple production-grade full-stack applications with real-time, AI-integrated functionality — including a live, animated digital portfolio.
- **Cross-Domain Expertise:** Combines web development, AI/ML, computer vision, cloud computing, and cybersecurity knowledge.
- MUN Workshop Participant — Tarkshastra X Diplomacia Bootcamp on MUN and Debating, D Y Patil College of Engineering.
- **Languages:** English (Professional Proficiency, C2 EF SET Certified), Hindi (Native), Marathi (Native)
